

A Cartoon Guide to Large Language Models

Liam O'Neill

Associate Prof. at UNT

Date: July 8, 2026

Discussion Questions

- 1) Did you ever read a book - or watch a video --and wonder –
Was this written by a Large Language Model (LLM)?
- 2) What made you think it was written by an LLM?
- 3) Did you end up finishing the book?
- 4) Why does AI represent both a significant threat – and a significant opportunity for the future of higher education?
- 5) Are there certain tasks – or jobs – that are a good fit for an LLM?
- 6) What are some tasks that are easy or intuitive for people – yet almost impossible for LLMs?
- 7) Suppose an android communicates through an LLM. Would he or she be able to pass a Turing test? Why or why not?
- 8) Do you feel that an LLM has an agreeable personality? Could you become “friends” with an LLM?
- 9) Looking back on your life – have you ever learned valuable lessons from your mistakes?
- 10) Did you ever learn valuable lessons from the mistakes of others?
- 11) If you could adopt a technology that would prevent you from making mistakes – would you adopt it? Why or why not?

Thanks for attending my talk!!
